airia

Airia Community Guidelines

Quick Reference Summary

☑ **DO**: Share innovative AI solutions, document thoroughly, respect others, test before sharing
✕ **DON'T**: Submit harmful content, violate privacy rights, mislead others, infringe on IP rights
✉ **Questions/Reports**: support@airia.com

Welcome to the Airia Community. This space exists to promote AI innovation by enabling creators to share agents, models, prompts, and related content ("Submissions") with a global community. We believe in:

- **Collaborative Innovation**: Building together achieves more than building alone
- **Responsible AI**: Ensuring AI benefits everyone while minimizing potential harms
- **Open Knowledge**: Making AI accessible to creators at all skill levels
- **Ethical Development**: Prioritizing safety, fairness, and transparency

Whether you are sharing your latest agent or visiting the Airia Community exploring new possibilities, these guidelines help us maintain a safe and innovative environment.

Content Standards

Prohibited Content

You agree to not make any Submissions that:

- **Harmful Applications**: Could cause any harm, including physical, emotional, or financial harm
- **Deceptive Content**: Mislead users about capabilities, origins, or purposes
- **Hateful Content**: Promote discrimination, harassment, or violence

Ethical AI Use

You will:

- Promote beneficial outcomes
- Consider potential misuse scenarios
- Include safeguards against harmful applications

Quality Expectations

Before you make a Submission, you will:

- Check for edge cases
- Ensure consistent and reliable performance

When making a Submission, you must make sure your Submission:

- Functions as described in your description and/or documentation
- Includes clear instructions for use and implementation
- Clearly indicates third party dependencies and document any external data connections

Transparency Requirements

Every submission must include:

- **Title and Description**: Let us know how it works! Provide a summary of the intended use (examples are always welcomed)
- **Limitations**: Known constraints, edge cases, or failure modes
- **Setup Instructions**: Step-by-step implementation guide if the Submission is a template

Example documentation:

Model: GPT-5 based administrative agent
Training Data: School policies
Limitations: May struggle with technical jargon
Intended Use: General policy questions

Collaboration Guidelines

You will:

- Share appropriate knowledge generously
- Credit collaborators appropriately

Intellectual Property & Attribution

Licensing Requirements

When necessary, you will:

- Specify a clear license for your submission
- Recommended licenses: Permissive open-source licenses (MIT, Apache 2.0)
- State any commercial use permissions or restrictions

Special Considerations

Sensitive Domains

For professional or sensitive submissions (e.g., healthcare, finance, or legal, etc.), you will:

- Confirm that your Submission does not violate any legal terms of any third party service utilized by your Submission
- Include prominent disclaimers
- Document any regulatory compliance requirements
- Emphasize professional oversight needs (human in the loop)
- Never claim to replace professional advice or services

Age-Appropriate Content
- Clearly label Submissions with age considerations
- Implement appropriate content filters
